

Mini-Project-Summer 2025

USIU university, Kenyan campus has clubs for students e.g. drama club, Club of Hotel and Tourism, etc. You have been hired to build a dynamic web application that allows university departments or clubs to **create, manage, and display campus events**. Users (students) can **register for events**, leave **comments**, and receive **email notifications**.

You Will be required to: -

- Realize a functional Frontend using (HTML; CSS; JavaScript)
- Realize a functional Backend Using PHP
- Realize a functional Database in MySQL or Your choice
- Demonstrate where you have applied AJAX
- Be as creative as possible (attracts 1 mark from each criteria)

[NOTE: Realize is similar to Develop]

Marking / Assessment Criteria

Criteria	Description	Marks
1. Dynamic Web Pages	- Use of HTML/CSS and JavaScript to create responsive and interactive UI. - Dynamic content loading without full page refresh (e.g., using AJAX or Fetch API).	5
2. Client-Server Communication	- RESTful API calls implemented correctly (GET/POST). - Use of JSON for client-server data exchange. - Error handling on both ends.	3
3. Backend Logic & Data Management	- Functional backend handling CRUD operations. - Proper database integration. - Validation and data persistence.	3
4. Overall Functionality & Code Quality	- Core features (event listing, registration, and comments) work smoothly. - User actions reflect correctly in the database and frontend. - Organized code structure (separation of concerns). - Proper naming, comments, and readability.	4
	Total: 15 Marks	15

All the best!!
